TECHNICAL FEATURES

Sealed battery compartment assures continuous electronic contact in rugged working conditions

Aluminium body with special coating suitable also for antifreeze and windshield washing fluid

Robotically welded electronics board equipped with a wide LCD screen

The display is welded permanently on the electronic card

Double layer protective cover provides an air tight seal with the aluminium body

The use of 4 magnets provides superior control and precision measurement

A ribbon wire connection between the buttons and the electronic board provide superior connectivity

Raised buttons on the membrane produce an improved operational feel

Meter uses standard "off the shelf" two 1.5 v AAA batteries

Oval gears made of POM or PVDF are highly resistant to fatigue and offer excellent chemical resistance
