

JCHEM-FGCL

Technical Bulletin

The need for a cleaner, sanitizer and deodorizer is well recognized within the catering industry. Ordinary hypochlorite will sanitize and deodorize but it is corrosive to equipment and it self will not clean.

JCHEM-FGCL is a product formulated to carry out the function of cleaning, sanitizing and deodorizing in one step. It is safe to use on all cleaning surfaces and meet food grade standards for purity and is approved by Health organizations.

FEATURES

- 1.) Chlorodyne crystals provide for chemicals stability, unique water softening and free rinsing nature.
- 2.) Instant release of chlorine on solubilizing chlorodyne ensures fast cleaning with little scrubbing resulting in odor free storage areas and drastic reduction in spoilage.
- 3.) Unique, pink color acts as a indicator on activity. Spent **JCHEM-FGCL** solutions become colorless.

USAGE

JCHEM-FGCL is an excellent cleaner and sanitizer for walk-in coolers, refrigerators, wash rooms, storage bins and in fact is used in all areas within the kitchen where cleaning and sanitizing is of importance.

1. **JCHEM-FGCL** may be dispensed through a shaker jar. The fine crystals that are left on the wet surfaces may be wiped down or if necessary, brush down and this way, surfaces are cleaned, sanitized and deodorized.
2. Dissolve a teaspoonful of **JCHEM-FGCL** in one gallon of clean, cold water. The solution formed will produce between 180 - 250 ppm available chlorine. The solution can be used to soak utensils, tea and coffee cups (in order to remove tannin stains).
3. **JCHEM-FGCL** is also used to sanitize tea and coffee urns. Where **JCHEM-FGCL** is used, first class coffee cups with no taint is produced time and again.
