HAND CLEANER

The problem of bacteria and the need for a sound program on hygiene and cleanliness is emphasized repeatedly through the media of training programs and advertisements. The focus today is on preventive programs and the biggest issue is contamination of food and utensils by soil hands. **HAND CLEANER** is a product designed for cleaning of hands. It contains a well-known bactericide and its emollient properties will ensure hands that are repeatedly washed will remain supple and free from dryness.

PRODUCT DESCRIPTION

A light pink color liquid.

pH - neutral.

FEATURES

- 1.) Formulated from soft, synthetic surfactants to prevent over drying of skin due to loss of natural oil from the skin.
- 2.) Safe bactericide ensures effective removal of microgens.
- 3.) Contains no harsh alkalis.
- 4.) Rinses easily.

USAGE

Dispensed through hand-soap dispenser or any other commercially available dispensers for sound economies.
