## HEAVY DUTY ALKALINE CLEANER

**HEAVY DUTY ALKALINE CLEANER** is a powerful alkaline cleaner formulated to remove “baked on” soils, carbon and greases that are commonly found in factories and manufacturing plants. **HEAVY DUTY ALKALINE CLEANER** combines all the safety features such as non-spattering, quick action, which is essential in a product representing one of its kinds.

### FEATURES

Will clean baked on greases, carbon and all kinds of oily soils that is commonly found in factories and manufacturing plants. Combines a synergistic rate of alkalinity with detergency, which ensures rapid penetration, saponification and emulsification of oils and greases.

\* Safe to use on iron, stainless steel, porcelain and glass.

\* Phosphate free concentrated product.

### USAGE

Cover exposed electrical connections and appliances in factory floor. Spray **HEAVY DUTY ALKALINE CLEANER** on to the surfaces to be cleaned. Allow **HEAVY DUTY ALKALINE CLEANER** to attack soil for about 10 minutes. Remove all residues, rinse out surfaces with plenty of water. Sponge rinse to remove all fat residues.

For tough work, use concentrated. With other jobs, **HEAVY DUTY ALKALINE CLEANER** can be used at dilutions of 1:1 or 1:4 depending on the soil and grease condition. Store **HEAVY DUTY ALKALINE CLEANER** in cool environment.
