

JCHEM-IKU

INDUSTRIAL KLEEN-UP

INDUSTRIAL KLEEN-UP is a synthetic blend of non-ionic surfactants, which provides for synergistic cleaning properties. This concentrated neutral liquid detergent is a safe and general-purpose detergent suitable for the applications found in the Institutional and Food industries.

FEATURES

Colorless with light fragrance. Safe to use on all surfaces including aluminium and other soft metals. Suitable for use under all types of water conditions, i.e. both hard and cold water. It is completely biodegradable in water. Its fast drying and rinsing properties gives spot free surfaces.

USAGE

INDUSTRIAL KLEEN-UP is a high foam detergent; therefore, it is useful when used in conjunction with air to provide foam-cleaning applications. Concentrations to use vary with the conditions, as a brief guide 1/4--1/3 oz. per gallon of water is suitable.
