

JCHEM – COS QUAT

Technical Bulletin

JCHEM-COS QUAT is a mixture of liquid quaternary ammonium compound which serves to disinfect, sanitize and deodorize. It is widely used in food outlets and kitchens as a spray- and wipe-on sanitizer, which also functions as a fly-repellant. **JCHEM-COS QUAT** is safe to use on tables and floors to sanitize and also repel insects.

For sanitizing hands, dilution with clean water is required at mixture of 1:50 or 1:40.

PROPERTIES Clear light yellow liquid

Specific Gravity : 1.02±0.02

pH(1%) : 9.50±0.5

Dissolve completely in water in all proportions

Biodegradable

Non-offensive odour

USAGE

Used on previously cleaned surfaces only

Mix 1:2-1.5 for spray-and –wipe application.

For floor mopping, use 1:20-1:50 depending on requirement

For hand sanitizing, mix 1:50 or 1:40 with water, prior to applying on to hands for sanitizing purpose, dry up before handling foods.

**Not advisable to use concentrated on hands, due to its alkalinity, apply hand moisturizing cream is suggested if frequency of usage is high.
