

JCHEM CS

JChem Celmend Steel

JCHEM CS is multi purposes adhesives to metals, wood, glass, masonry, ceramics and many plastic. It consist 2 parts, a base and a curing agent, hand mix adhesive and the mixture will appear uniform in color and will harden like steel after 20 minutes

OUTSTANDING FUNCTIONAL CHARACTERISTICS

- Ready to use and hand mix adhesive
- Temperature range from -40° C to 149°C
- Harden on 20 minutes
- Tapped, Sanded and Drilled after 24 hours curing
- Underwater repaired
- Density 15.8 lb/gal
- Inner Compression Strength 18,000 psi
- Hardness (Shore D) 85

JCHEM CS use as ;

- a) Sealing water or oil leaks for tank, leaks in plumbing, housing, cast iron housing, aluminum housings, leak in gasoline tanks, cracked or broken cast iron radiators, radiators, engine block, gear box hair line crack.
- b) Repairing threads by filling hole, drilling and tapping a new threaded hole.

Instruction to use:

Clean and removed oil on the surface before apply **JCHEM CS**. Hand mixed the 2 parts – base and curing agent into uniform color. To ensure maximum adhesiveness, roughening the surface will get better results. **JCHEM CS** will be harden in 20 minutes after mixing, any dripping or tapping will be after 24 hours.
