

## UNIVERSAL TACLUBE - NON DRIP / ELE VATOR GUIDE OIL

F600 / F646 is a VI solvent extracted paraffinic based oil compounded with a tackiness additive to improve film strength, cohesiveness and adhesiveness.

OUTSTANDING FUNCTIONAL CHARACTERISTIC

- Excellent anti rust and anticorrosion properties
- Superior anti wear additive to protect against wear •
- Tackiness agent reduces oil consumption and "sling-off"
- Protects sliding surfaces and chains against wear -
- High film strength
- Economical once-through lubrication

## TYPICAL APPLICATION

It is frequently used on chain, slides, ways, crossheads and loose fitting journal bearing where leakage is a problem. It is also suitable to use as a non-drip chain and sprocket lubricant. It is also recommended to use as an inexpensive bar lubricant for chain saws.
